

1st Joint XFEL/ILC Meeting

Nick Walker DESY 17.11.2006

Introduction

- ILC is fundamentally linked to XFEL
 - Based on identical technology (TESLA)
 - R&D programmes are inter-connected
- We often talk of 'synergy', but what does this really mean?
 - Putting words into actions
 - Understanding how XFEL can help ILC can help XFEL
- Stronger interaction between XFEL and ILC groups at DESY
 - and ultimately to the Global ILC effort

Meetings

- Approximately every four weeks
- Well defined focus areas:
 - Tunnel layout (today)
 - RF power source and LLRF (19.1.2007)
 - Cryomodule design elements
 - Including module test stand programme
 - High-gradient cavity programme
 - Including auxiliaries
 - Operations and Availability
 - FLASH experimental programme

– ...

Today's Meeting

XFEL and ILC tunnel solutions

- Understand how XFEL is solving the problems of a single-tunnel solution
- The ILC service-tunnel (two-tunnel) approach
 - Including some overview of other civil engineering design elements.
