

Budget requests from French Institutes for ILC (machine) funding in 2007 (EU funding excluded).

## For work on ATF-2

Joint request from LAL – LAPP – LLR Polytechnique to the ANR for 800 k€ over the period 2006 – 2010, in collaboration with KEK.

- Development and implementation of beam correction algorithms
- Beam-line modeling with an optimised version of the GEANT4
- Active stabilisation of critical mechanical support structures for the final focus
- Development of beam instrumentation

## For power coupler development

Request from LAL for 100 k€ to the IN2P3 (60 k€) already agreed.

- Purchase of proto-types
- Consumables for high power tests

more modest sums....

- LAPP and LAL request 30 k€ for travel from Franco-Japanese AIL (ATF-2)
- LAL requests 15.8 k€ for travel/consumables from AIL (coupler development)
