

Beyond EUROTeV

E.Elsen

FP7 will come

- Fund request originally 2x FP6
- EU overall budget agreed on
 - FP7 scope widened
- Expect somewhat larger funding for Research Infrastructures - over longer period

Mandate from EU

- On approval of the Design Study we were asked to follow this up
- During the ESFRI Meeting in Nottingham the ILC was one of four Global Projects on the list of opportunities

Preparation for FP7

- Research Collaborations have to form
- What are the best arrangements?
 - Topics
 - Institutes / infrastructures

Boundary Conditions

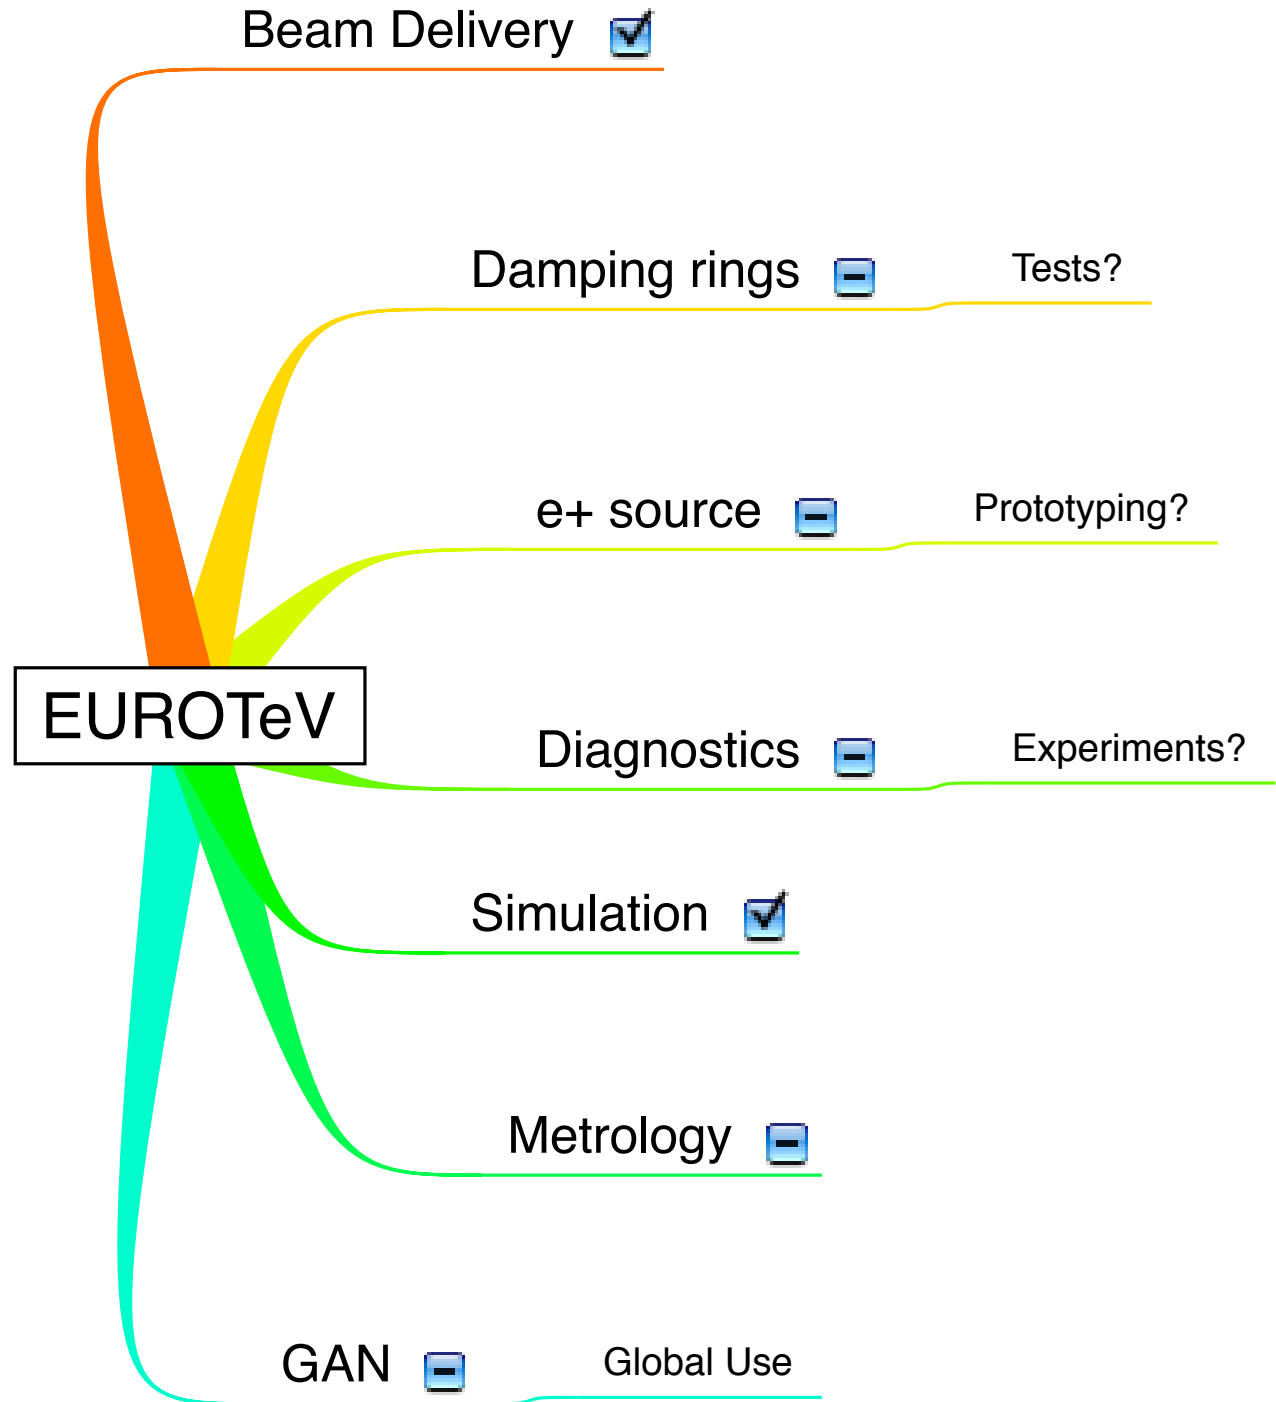

- EUROTeV will end 2007 (or slightly afterwards)
- ILC
 - ILC GDE:TDR towards end 2008
 - Decision for ILC around 2010
- CLIC
 - R&D
 - Prototyping

Where will we be in 2007?

What is to be continued?

Construction has to follow Design Study

New Proposal!

Options for Follow-up

- Superconducting RF
 - Key performance element for ILC
 - Existing infrastructure @ CERN & DESY
- ILC need driven approach
 - GDE R&D Board
- CARE II
 - Coordinated Accelerator Research in Europe

Initiate Discussions

- Arrangements have to be made during the course of this year
- Proposals 2007
